

Cap-It™ is a recyclable paperboard clip solution for PET bottles with neck rings that is an alternative to plastic rings and shrink film packaging. Cap-It features an intelligent design that provides on-shelf differentiation via a generous billboard area, that still allows good visibility of the bottles.

Cap-It works with a variety of shapes and sizes of PET bottles ranging from 4- to 8-pack formats. It can be packaged with our AutoClip™ machinery solution, including the next-generation **AutoClip CIG3**, that runs at higher speeds while providing enhanced bottle stability.

Sustainability

- Clip-style cartons use significantly less paperboard than other multipack carton styles
- Paperboard packaging solution made from renewable wood-based fiber from sustainably managed forests
- Recyclable through household paper waste streams
- Skirt length can be varied to optimize the amount of board used, depending on application

Operational Efficiency

- Maintains good pack integrity to meet the demands of the supply chain
- Efficient, high-speed machinery options available via AutoClip technology with speeds up to 250 packs per minute
- Accommodates multiple bottle sizes, types, and configurations from 4- to 8-pack
- Suitable for multiple bottle types, sizes, and configurations
- If required, bar codes can be masked by adjusting the length of the skirt

Consumer Experience

- Comfortable and reliable carry experience with easy-access finger holes
- Bottles are well protected but can be easily removed once ready to consume
- Offers billboard space for high-impact branding or messaging related to the sustainability of the pack
